<b>Title</b>	<b>Locus sonus : audio in art</b>
<b>Description</b>	Locus Sonus is a research group specialising in audio art. Based at École Supérieure d'Art d'Aix-en-Provence and École Nationale Supérieure d'Art de Nice Villa Arson, their interest is to investigate the, 'innovative and transdisciplinary nature of audio art forms in a lab-type context'. In the Videos section there are QuickTime recordings of sound installations. The Symposiums section has recordings of live performances. Locus Sonus organise festivals and seek new contributions through an open call. There are links to these projects for 2006 on the website. The website is available in a French or English language version.
