Locus Sonus Audio Streaming Project - Summer 2006

I am participating in the [Locus Sonus](#) Audio Streaming Project, during late august. A number of sound artist are delivering sound feeds over the Internet thru Pure Data patches. From different continents different sound scapes from the surroundings, may be urban or as in my case more of the countryside sound scape. The streams are then later used in different new artistic contexts. Read more about Locus Sonus Audio Streaming Project [here](#) and the ongoing activities at [Roebing Bridge at Upper Delaware River Valley](#)/NY and Lower Manhattan/NY, USA. My 24/7 stream and other streams can be listened to [here](#).
