Locus Sonus > Audio in Art

http://nujus.net/~locusonus/site/index_e.html

"Locus Sonus is a research group specialized in audio art (Ecole Superieure d'Art d'Aix-en-Provence, Ecole Nationale Superieure d'Art de Nice Villa Arson).

Our objective is to experiment and evaluate the innovative and transdisciplinary nature of audio art forms in a lab-type context.

We are also concerned with in the communal, collective or multi-user aspects inherent to many emerging audio practices and which necessitate working as a group. Two main thematic define this research - audio in it's relation to space and networked audio systems. The "Lab" proposes a process combining practical artistic experimentation and critical evaluation in a group context.

The Locus Sonus Lab is currently focusing on a process which revolves around the use of multiple audio streams. The streams which are basically open-mike continually upload chosen soundscapes or sound environments, as playable material. The way in which we work with other people to set up and maintain the streams is part of the methodology, indeed the technology provides the basis to construct a human network".
